

**Insituform**<sup>®</sup>  
An Aegion<sup>™</sup> Company

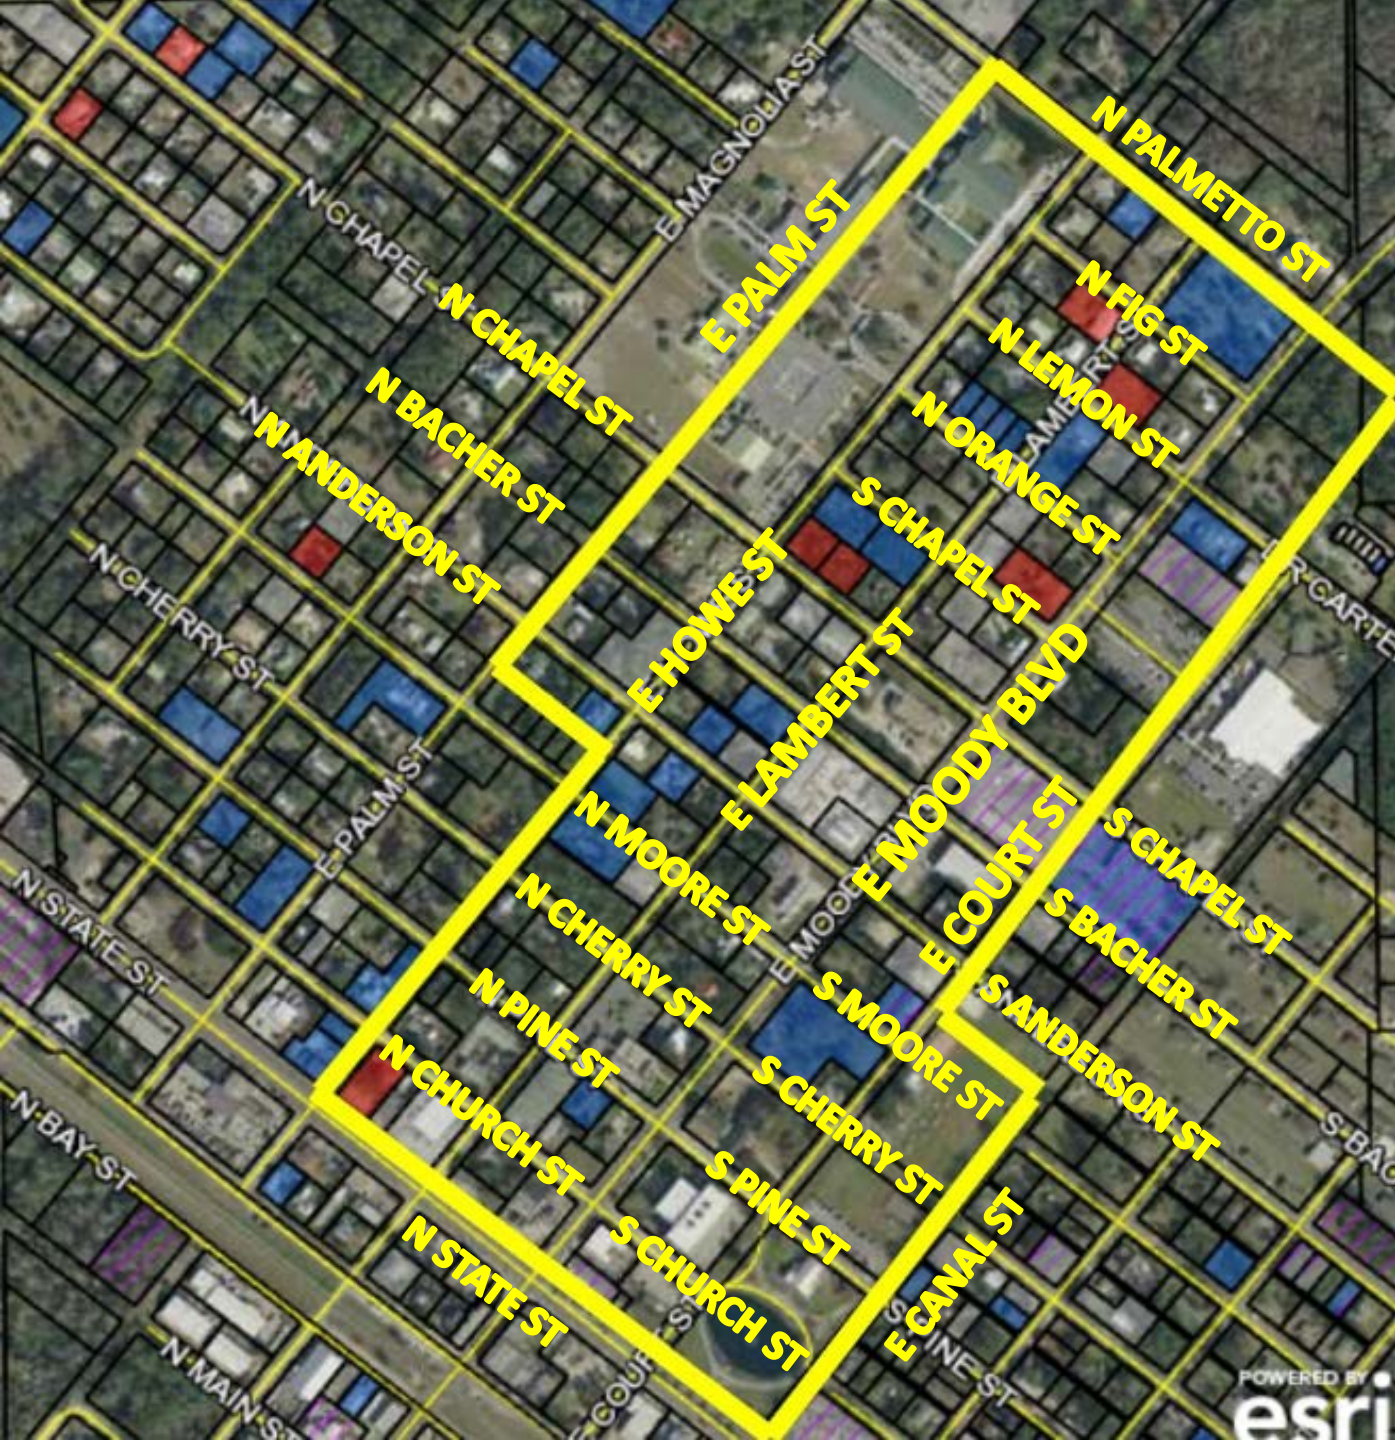

Insituform Technologies is under contract by The City of Bunnell Utilities Department to perform an inspection of the sanitary sewer lines in your neighborhood. We have contracted Proline Vector Services, Inc., a firm that specializes in this type of work, to complete this portion of the project for us. We expect this work to occur in your neighborhood from Monday April 20<sup>th</sup> 2020 thru Friday April 24<sup>th</sup> 2020.

The following actions will greatly reduce these work activities having any sort of impact on your home. Please keep toilet lids closed and pour 1 gallon of water down all floor drains or any rarely used sinks/ tubs/ toilets to ensure that a water barrier is maintained in the traps. **It is also highly advised that you remove your cleanout cap in the morning and replace it at night for the dates shown above. This will reduce the possibility of water pushing out of the toilets onto the bathroom floor from any back pressure that may occur in the sewer main.**

We apologize for any equipment noise which may be created. Please contact any of the numbers below with any issues or concerns.
